WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

October 7, 2025

## Tropical Activity

### Atlantic – Disturbance 1

- A tropical wave dubbed Invest 95L is now likely to become our next tropical depression or Tropical Storm Jerry within the next day or so as the system spins across the Atlantic and approaches the Lesser Antilles.
- Showers and thunderstorms are gradually becoming better organized in association with an area of low pressure located a little more than 1000 miles east of the Windward Islands.
- This system is expected to move quickly west northwestward across the central tropical Atlantic and then move near or north of the northern Leeward Islands on Thursday and Friday.
- Formation chance through 48 hours: High (90%); 7 days: High (90%)

### Atlantic – Disturbance 2

- A trough of low pressure located over the Yucatan Peninsula is producing a large area of disorganized showers and thunderstorms.
- This system is expected to emerge over the Bay of Campeche later today, and some slow development is possible before it moves inland over southern Mexico late Wednesday or early Thursday.
- Formation chance through 48 hours: Low (10%); 7 days: Low (10%)
