WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

March 12, 2025

## Potential Flooding & Mudslides California

- An atmospheric river event bringing the chances of heavy rain, strong winds and snow to parts of California may cause more problems for residents impacted by recent wildfires.
- Tuesday, authorities around burn scars created by fires such as the Eaton and Palisades in January issued evacuation warnings for residents.
- The risk of heavy rainfall threatened to create a mud mess for homes and businesses that survived the initial flames.
- Forecast models show as much as 1 to 4 inches of rain occurring during the remaining days of the workweek, which could lead to flooding and mudslides.
- Residents across Southern California are being urged to stay vigilant by having multiple ways to receive alerts in case conditions quickly worsen.
- The most critical time for residents will be later Wednesday into Thursday morning.
