- Environmental conditions could support some slow development of this system through early next week while it moves quickly westward across the eastern and central tropical Atlantic at 15 to 20 mph.
- Formation chance through 48 hours...low...10 percent.
- Formation chance through 5 days...low...20 percent.

Severe Weather & Flood Activity

Mississippi

- Torrential rains Tuesday night into Wednesday resulted in flooding of roads and highways around central Mississippi, prompting a flash flood emergency across central portions of the state, including in Hinds County, where Jackson is located.
- AccuWeather forecasters have been warning for days about the likelihood of flooding across the region. The National Weather Service (NWS) called the flooding a "life-threatening situation."
- Since Wednesday morning, more than 6 inches of rain has fallen across the city, and there have been at least 28 reports of flash flooding from weather-trained spotters. Rainfall totals over the past 24 hours saw even more landing in Okahatta (9.06 inches), Hubbard (8.09 inches) and Ofahoma (7.75 inches).
- In Jackson, Mississippi, 5.05 inches of rain fell on Wednesday, which is 8% of Jackson's annual rainfall in one day. The city's annual rainfall on average is 57.35 inches.
- According to storm chaser Brandon Clement, floodwaters overtook roadways in Canton, which is just north of Jackson. Water levels rose to the bottom of street signs, and Clement witnessed people standing on top of their cars for safety.
- In nearby Florence, more than 100 children and employees had to be rescued from rising waters at a local daycare, with Rankin County assisting the save with high-water rescue vehicles.
- Just east of Jackson, in Brandon, floodwaters breached a nursing home.
