WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

December 28, 2021

Severe Weather Outlook

- Less than three weeks after a historic tornado outbreak devastated portions of the central and southern United States, another round of feisty severe weather could be delivered in the final days of 2021.
- AccuWeather forecasters are eyeing a developing storm as it pushes across the Midwest. In the coming days, stormy weather is forecast to develop across a wide swath of the central and eastern United States.
- At the root of the hazard is an overabundance of warm, moist air which is set to be transported from the Gulf of Mexico to portions of the southeastern U.S. by midweek.
- "This pattern will allow moisture to work well northward into portions of Louisiana, Arkansas, Mississippi, Alabama and even Tennessee on Wednesday and could expand further into the southern Appalachian Mountains Wednesday night," said AccuWeather Senior Meteorologist Matt Rinde.
- Beginning Tuesday night and continuing for many areas into Wednesday night, multiple rounds of rain and thunderstorms are forecast to develop from the Gulf Coast through the Tennessee Valley and into the Ohio Valley.
- "The main threat from these storms will be flash flooding and damaging winds, with an AccuWeather Local StormMax™ of 80 mph," Rinde cautioned, adding that there can also be isolated tornadoes and hail late Wednesday.
- Areas likely in the path of these potentially feisty storms include cities like Nashville, Tennessee; Birmingham, Alabama; and Atlanta.
- While any thunderstorm can become locally severe midweek, forecasters say the greatest risk for severe weather will center over portions of the Gulf Coast states.
- The severe weather bull's-eye is forecast to mainly focus over portions of Mississippi and Alabama on Wednesday as atmospheric conditions will be the ripest over these areas.

Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied /Pending	Number of Counties/Tribes
WA	Severe Storms, Straight-Line Winds, Flooding, Landslides & Mudslides Nov 5 - Dec 2, 2021	12/17/2021	Pending	3 Counties/3 Tribes
