WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

April 18, 2025

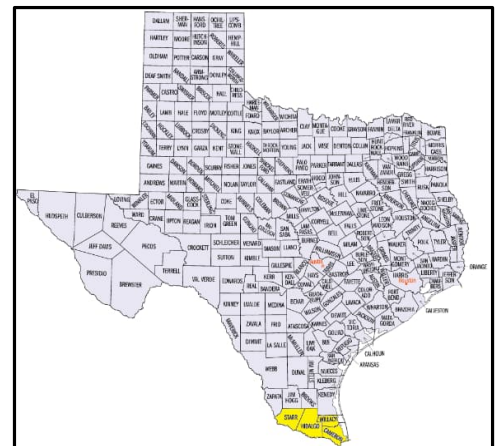

Severe Weather Outlook Central U.S.

- A major severe storm risk will once again emerge Friday, impacting over 52 million people across 11 states.
- From the southern Plains up through the Midwest, the forecast includes the possibility of hail, damaging winds and tornadoes.
- This volatile weather pattern will linger through the holiday weekend, threatening the Texas I-35 corridor with more severe storms on Saturday before shifting its focus northward to the central Plains on Sunday.
- The FOX Forecast Center said Friday's severe storm threat zone is a massive area centered along a cold front that will stretch nearly border to border.
- Redevelopment of storms is expected by midday over parts of Wisconsin and into northern and Upper Michigan.
- Isolated supercells are expected to track across Illinois, Indiana and perhaps southern Michigan.
- Strong wind gusts greater than 60 mph and small hail are the greatest threats.
- The greatest tornado potential will remain in Missouri and Illinois.
- Cities in the path of these storms include St. Louis, Milwaukee and Chicago. Indianapolis and Detroit are also included.
- Early evening, storms should start to intensify. Supercells could develop with the initial round of storms that may produce a couple of tornadoes across western Oklahoma.
- Hail larger than golf balls will also be possible from central Kansas to northwest Texas.
- In Kansas and Missouri, clusters of severe storms will also be possible and could produce 50-60 mph winds and hail.

Disaster Declaration Request Texas

- On April 17th, Governor Greg Abbot requested FEMA Individual assistance for the following counties: Cameron, Hidalgo, Starr and Willacy.
- On March 29th Governor Greg Abbott issued a disaster declaration for four South Texas counties impacted by rainfall and flooding that continues to affect homes, businesses, and the agricultural industry throughout the region.
- On March 31st, the Governor announced that he directed the Texas Division of Emergency Management (TDEM) to request

that Federal Emergency Management Agency (FEMA) officials join state and local partners in conducting joint preliminary damage assessments in South Texas communities impacted by recent flooding.

- Rainfall of nearly 20 inches (measured) and potentially just over 21 inches (radar-estimated) pummeled much of the Rio Grande Valley, from eastern Starr County through southern Hidalgo County and into northern Cameron County.
- The floods were devastating in dozens of neighborhoods across the Valley, with the most notable damage centered on northern Cameron County.
- Based on preliminary reports which suggested that this event rivaled that of the Great June Flood of 2018, damage and recovery totals from the flood were likely to exceed \$100 million.

Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied/ Pending	Number of Counties/Tribes
OK*	Wildfires and Straight-line Winds	3/21/2025	Pending	7 Counties
