WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 9, 2024

Severe Weather Activity

Texas

- More than 2.3 million homes and businesses lacking electricity by Tuesday morning, according to PowerOutage.us.
- Beryl, which was the season's earliest Category 5 hurricane on record, had weakened to a tropical storm after it made landfall on the Texas coast early Monday as a Category 1 storm — unleashing life-threatening storm surge, damaging winds and heavy rain
- President Biden pledged federal resources, according to a statement late Monday. His administration "will make sure Texans have the resources they need to get through the storm now and to recover moving forward," he told Houston Mayor Jason Whitmore.
- On July 6, Acting Governor Dan Patrick today urged Texans to make final preparations and announced that he has added 81 counties to the state's Hurricane Beryl Disaster Declaration.
- This brings the total number of Texas counties included in the state's disaster declaration to 121 counties.

Severe Weather Outlook

- Beryl is reaching the final stages of its extended journey as the storm's remnants shift into the Midwest on Tuesday, en route to becoming post-tropical.
- Beryl, now a tropical depression, will continue to move steadily northeastward into the Lower Ohio Valley on Tuesday and into the Lower Great Lakes on Wednesday, the FOX Forecast Center said.
- While the winds of Beryl will continue to weaken as it loses the fueling power of the Gulf of Mexico waters, the storm will continue to be a prolific heavy rain producer as it moves northeastward.
- Along the path of Beryl, rainfall totals of 1-3 inches across a large section of Missouri, central to southern Illinois, Indiana, and far northwest Ohio into the southern portions of the Lower Peninsula of Michigan.
- The highest tornado threat is anticipated across southern Illinois, southwest Indiana and western Kentucky after 4 p.m on Tuesday and then extending east toward the Louisville metro after 8 p.m., the FOX Forecast Center said.
- The moisture associated with what's left of Beryl will reach the Northeast starting Wednesday.
