Tornado Activity

Florida

- FEMA was in Iona on Wednesday, surveying the damage from Sunday's tornado. They marked buildings to let people know to stay out because they are unsafe.
- Since the severe storms hit on Sunday, the National Weather Service has been using photos, videos, and in person observations to not only gauge the strength, but also the path of these tornadoes.
- As of Wednesday, there were five tornadoes: an EF-2 in Lee County, two EF-1s in Charlotte County, and two EF-0s in Collier County.
- There was originally a sixth in Collier County, but that has now been found to be part of the Lely Resort tornado.
- While there are five tornadoes in the official count, the National Weather Service says they are still investigating data, including storm path and damage reports in parts of Cape Coral.
