WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

January 14, 2026

Snow Forecast Appalachians

- Cold rain is falling from parts of the Gulf Coast to the Ohio Valley on Wednesday morning, ahead of the next winter storm, which is expected to impact at least 25 states and bring snow showers as far south as North Carolina and Tennessee.
- Lake-effect snowbelts in the Midwest and interior Northeast are once again in the bull's eye for the highest accumulations.
- Winter Weather Alerts have been posted for downwind of both Great Lakes.
- The most intense snowfall is expected to begin Wednesday night from much of the Lake Michigan shoreline in Michigan westward toward the Indiana-Illinois border.
- Snow totals could exceed 8 inches and potentially approach a foot in the most persistent band, the FOX Forecast Center said Wednesday.
- National Weather Service has issued a Winter Storm Watch for the southern shore of Lake Michigan, including South Bend, Indiana, from Wednesday through Thursday.
- The storm will start to make its way through the Appalachians starting late on Wednesday, mostly affecting the mountain region.
- Snow will occur in the high terrain from the Tennessee and North Carolina border, northward into West Virginia and along the highest peaks of the Appalachians.
- Higher elevations could see up to a foot according to recent computer forecasts with some of the lower elevations could see 3-5 inches of snow.
