WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

September 15, 2025

Tropical Activity

Atlantic – Disturbance 1

- A tropical wave over the central tropical Atlantic is producing a large area of disorganized showers and thunderstorms.
- Will begin to move into a more favorable environment for development in the next couple of days.
- A tropical depression is likely to form by the middle to latter part of this week as the system moves west-northwestward at 10 to 15 mph over the central tropical Atlantic.
- Formation chance – 48-hour: Medium (40%); 7-day: High (80%)

Flash Flood Threat

Mid – Atlantic

- A potent coastal storm spinning off the mid-Atlantic is slamming portions of North Carolina and Virginia with heavy rain and strong winds.
- According to the FOX Forecast Center, the coastal low that has been forming near the Carolinas is expected to slowly drift off to the north over the next few days.
- Bringing several rounds of unsettled weather to the mid-Atlantic.
- FOX Forecast Center said that Monday and Tuesday will be wet, stormy days.
- Some computer forecast models show that the coastal storm could move farther to the north into Maryland, Delaware and New Jersey.
- Most areas could pick up 2-3 inches of rain, with some areas seeing upwards of 3-5 inches.
- There's even an isolated tornado risk along the coast in portions of North Carolina and Virginia.
