

DAILY DART

WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 3, 2024

Tropical Activity

Atlantic - Hurricane Beryl (CAT 4)

- Located 125 miles SE of Kingston, Jamaica moving WNW at 20 mph.
- Maximum sustained winds 145 mph.
- Hurricane force winds extend outward up to 45 miles; tropical storm force winds extend outward up to 185 miles.
- Weakening is forecast during the next day or two, however, Beryl is forecast to be at or near major hurricane intensity while it passes near Jamaica later today and the Cayman Islands tonight.
- Beryl is likely to emerge in the southwest Gulf of Mexico this weekend after being steered by a heat dome of high pressure over the Southeast U.S. There is considerable uncertainty in Beryl's future after that.
- Beryl should have lost strength by the time it reaches the southwest Gulf because of wind shear and land interaction, however it could still bring significant impacts to the Gulf Coast as either a tropical storm or hurricane. Some restrengthening is possible.

Atlantic – Disturbance 1

- Located a few hundred miles E of the Windward Islands moving WNW at 20 to 25 mph.
- Development, if any, of this system should be slow to occur while it moves quickly westward to west-northwestward at 20 to 25 mph across the Caribbean Sea.
- Formation chance – 48-hour: Low (10%); 7- day: Low (20%)

Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied/ Pending	Number of Counties/Tribes
MI*	Severe Storms and Tornadoes	June 6	Pending	4 Counties
PR	Severe Storms, Flooding, Landslides and Mudslides	June 11	Pending	34 Municipalities
