WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 22, 2025

## Potential Tropical Activity Gulf Coast

- AccuWeather meteorologists are keeping a close eye across the northern Gulf for tropical development through the end of this week.
- While the area is not deemed a high risk, the zone that will be represented by a cluster of showers and thunderstorms that tracks westward along the northern Gulf coast is likely to have some significant impacts.
- The area of interest is associated with a batch of drenching showers and thunderstorms that are forecast impact the Carolinas, Georgia and off the southern Atlantic coast on Tuesday.
- From there, steering breezes will direct this budding low-pressure area toward the west across northern Florida and the northeastern Gulf coast from Tuesday to Wednesday, Louisiana and offshore waters from Wednesday to Thursday, and then along the Texas coast from Thursday to Friday.
- Regardless of tropical development or not, the northern Gulf and adjacent coastal areas along the Interstate 10 corridor will experience a period of stormy conditions from east to west this week with one or more rounds of drenching downpours and gusty thunderstorms.
- Some locations may receive upwards of 6 inches of rain, and a significant part of that may fall in a few hours, raising the risk of flash flooding in urban and low-lying areas.

## Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied/Pending	Number of Counties/Tribes
MI*	Severe Winter Storm	5/16/2025	Pending	11 Counties
OR	Severe Storms, Flooding, Landslides, Mudslides	5/19/2025	Pending	3 Counties
IN*	Severe Storms, Straight-line Winds, Tornadoes, and Flooding	5/28/2025	Pending	6 Counties
