WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

August 17, 2022

Tropical Activity

Atlantic – Disturbance 1

- A tropical wave over Honduras and the northwestern Caribbean Sea is forecast to move across Central America during the next couple of days and emerge over the Bay of Campeche, where an area of low pressure could form on Friday.
- Some gradual development of this system is possible while it moves northwestward over the southwestern Gulf of Mexico through the weekend.
- Formation chance through 48 hours...low...near 0 percent.
- Formation chance through 5 days...low...20 percent.

Flood Activity

West Virginia

- Kanawha and Fayette counties working with the state have a month to finalize damage assessment numbers from Monday's flash flood which damaged small communities along creeks that feed into the Kanawha River from Charleston to Gauley Bridge.
- State Division of Emergency Management Lead Project Specialist Jason Means said the gathering of the information is important when it comes to getting immediate help and possible federal assistance at a later date.
- Impacted residents are asked to complete an individual assistance survey.
- The governor's office has fielded a lot of calls from residents who were hit by the flood.
- Kanawha County Office of Emergency Management Director C.W. Sigman said the county had received information from nearly 50 residents by Tuesday evening. He's expecting that number to grow.
- Sigman said he doesn't believe there are many, if any, homes that were destroyed but several were damaged in the flash flood that hit Campbells Creek, Kelley's Creek and Hughes Creek in his county.
- "We do have homes that had water in it and if gets above 18 inches in a home that gets above the electrical service and that makes a big difference on what damages you have," Sigman said.

Joint Preliminary Damage Assessments

State	Event	Number of Counties for IA		Start-End
		Requested	Completed	
IL	Heavy Rain and Flash Flooding July 25-28, 2022	1	0	TBD
