WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

October 3, 2025

Tropical Activity

Atlantic – Disturbance 1

- The system is expected to meander near Florida and the Bahamas for the next several days.
- Strong upper-level winds are expected to prevent significant development of the low.
- The combination of the disturbance with the broader remnant boundary are still expected to produce heavy rainfall across portions of Florida and the Bahamas through the weekend.
- Formation chance through 48 hours: Low (10%); 7 days: Low (10%)

Atlantic – Disturbance 2

- A tropical wave is expected to move off the coast of Africa today.
- Forecasted to interact with another disturbance over the eastern tropical Atlantic, and then move westward after that.
- Environmental conditions are expected to become conducive for some slow development in a few days.
- A tropical depression could form near or east of the Lesser Antilles by the end of next week.
- Formation chance through 48 hours: Low (0%); 7 days: Med (40%)
