Hurricane Activity

Hurricane Beryl (CAT 1)

- Hurricane Beryl roared ashore in Texas early Monday morning, making landfall around Matagorda at 3:50 a.m.
- CT Monday as a Category 1 hurricane, pounding the region with torrential rains, flooding storm surges, and powerful gusts topping 70-90 mph that have knocked out power to nearly a million people in East Texas.
- "Life-threatening storm surge and heavy rainfall is ongoing across portions of Texas," the National Hurricane Center (NHC) said in their 5 a.m. CT update.
- Beryl's peak sustained winds were holding steady at 80 mph as the storm swirled about 55 miles southwest of Houston, as of the 6 a.m. CT update.
- Nearly 1 million electrical customers in Texas have already lost power, according to Centerpoint Energy's outage page.
- Gusts have hit 91 mph in Freeport, 86 mph in Matagorda City, 81 mph in Palacios and at an elevated station in Houston, 78 mph in Galveston, and 60 mph at Houston Intercontinental Airport.
- Storm surge is forecast to reach 3-7 feet in some spots near Beryl, and water was already pushing into the Texas coast and bays along Beryl's approach.
- The ferocious gusts are blasting torrential rainfall falling at rates of 2-4 inches an hour.
- The National Weather Service in Houston reports flash flooding is ongoing in parts of the Houston Metro area as 3-6 inches of rain have already fallen as of early Monday morning with at least another 2-4 additional inches possible.
- Hurricane-force winds over 74 mph are likely to continue near the storm's center – which is forecast to pass near the Houston metro area later Monday morning – with tropical storm-force gusts of 40 mph or more stretching 115 miles out from Beryl's center.
- Gusts could reach 60-70 mph in the Houston Metro area Monday morning as Beryl's powerful storm center passes just to the west of the metro area Monday morning.
- Much of East Texas could see 5–10 inches of rain, with localized amounts up to 15 inches by the time Beryl moves out.
- The Houston area is currently forecast to receive 5–8 inches of rain, with heavier amounts in the southern and western suburbs.
