WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

May 6, 2025

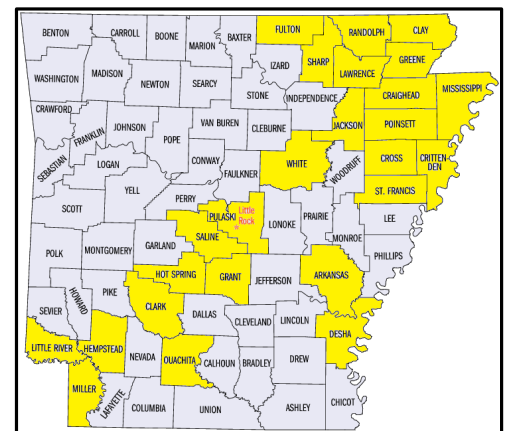

Severe Weather Outlook Southern U.S.

- A multiday severe weather and flash flood threat continues Tuesday, with millions of people across Texas and Louisiana bracing for storms that could produce baseball-sized hail, strong tornadoes and potentially life-threatening flooding.
- The threat zone includes cities such as Houston, Dallas, Fort Worth, Austin and Arlington in Texas.
- Very large hail, strong tornadoes (EF-2 or higher) and damaging wind gusts are all possible within any storms that ignite on Tuesday.
- Flooding is also a concern on Tuesday as powerful storms move across the southern Plains and along the Gulf Coast.
- The highest flash flood threat will start by midday on Tuesday across portions of East Texas and Louisiana.
- The strongest storms and heaviest rain are expected along the Gulf Coast by Wednesday morning, eventually extending into the Florida Panhandle.
- The highest totals will be found from East Texas through Louisiana and into southern Mississippi and Alabama.

Disaster Declaration Request Arkansas

- On May 3, Governor Sarah Huckabee Sanders requested a major disaster declaration in response to the severe storms, tornadoes, and flooding that occurred April 2-22, 2025.
- She is requesting individual assistance for 25 counties.
- The National Weather Service confirmed that 150 tornadoes occurred in a six-day period from April 2-7.
- There were 18 confirmed tornadoes in Arkansas.
- The combination of a stationary front associated with the system and the slow progression eastward resulted in catastrophic and historic flash flooding in parts of Arkansas, with widespread rainfall totals of over 6 inches being reported in many areas.
- The Ouachita River at Arkadelphia crested at 28 feet, just a little over 2 feet shy of the 1945 record of 30.3 feet.
- On April 2, Governor Sanders declared a state of emergency for severe storms, tornadoes and flooding.
