WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

August 19, 2024

Flood Activity

Connecticut

- One person has been reported missing in Connecticut after catastrophic flooding ripped apart and destroyed roads and trapped terrified residents as torrents of rushing water quickly rose and cut off escape routes.
- The dangerous situation began to unfold earlier in the day on Sunday as heavy precipitation continued to fall over the same areas of western and southern Connecticut for hours.
- The National Weather Service issued a rare Flash Flood Emergency for the area as the deluge continued, and many towns in the region reported blockbuster rainfall totals.
- The towns of Shelton and Newtown both picked up about 10 inches of rain on Sunday, while Monroe was just under that and reported receiving 9.98 inches.
- Middlebury picked up just over 9.5 inches and Naugatuck received just over 8 inches of rain.
- Significant damage from the widespread flash flooding led to local states of emergency being declared in the towns of Southbury and Naugatuck.
- A state of emergency was also declared in the city of Danbury in western Connecticut because of the flooding.
- Emergency crews responded to the Woodland Hills Complex on Shelter Rock Road, where a mudslide led to a gas leak and evacuations, according to the NWS and city emergency management officials.
- Several roads in the city remain closed as water continues to recede and cleanup operations continue.

Joint Preliminary Damage Assessments
