WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 29, 2024

## Tropical Activity

### Atlantic - Disturbance #1

- All eyes are on the Atlantic, where forecasters are watching for the possibility of tropical formation.
- "Environmental conditions are forecast to become conducive for some development thereafter, and a tropical depression could form later this week while the system is in the vicinity of the Greater Antilles or the Bahamas," the NHC said in its latest outlook for the disturbance.
- The odds of development have been slowly increasing since the weekend and currently stand at a 50-50 chance over the next seven days.
- Any interaction with the mountains on larger Caribbean islands will play a key role in the system's organization, the FOX Forecast Center said.
- For now, the consensus is that it will move in the general direction of Florida or the Southeast coast late this week and into the upcoming weekend.
- If the system strengthens into a tropical storm, it will be named Debby – the fourth named storm of the 2024 Atlantic hurricane season.

## Joint Preliminary Damage Assessments

State	Event	Number of Counties for IA		Start-End
		Requested	Completed	
VT	Severe Storms & Flooding Jul 10-11	7	7	7/22-7/26
