WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

May 5, 2025

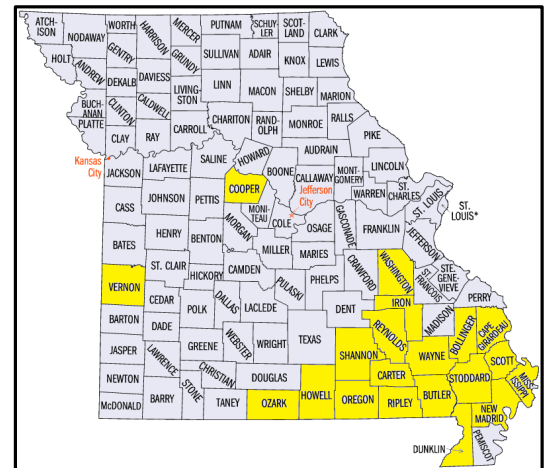

Severe Weather Outlook Northeast

- The threat of flash flooding is growing in the Northeast due to relentless rounds of rain and some thunderstorms fueled by a stubborn Omega blocking pattern over the U.S.
- The FOX Forecast Center said the blocking pattern has caused a so-called cutoff low-pressure system to stall over the Tennessee and Ohio valleys.
- Depending on the position of the frontal boundary, the easterly winds at the surface may enhance the precipitation in some higher-terrain areas, especially across portions of western Connecticut.
- Rain totals could approach 3-5 inches if the front struggles to move.
- There remains some uncertainty regarding the timing and location of the heavier rain bands as they reorganize and shift over the next few days.
- Flash flooding is possible, but forecasters said significant flooding appears unlikely due to the scattered nature of the storms.
- The threat zone includes the New York City and Poughkeepsie areas in New York, as well as Hartford, Waterbury, New Haven, New London, Bridgeport and Stamford in Connecticut.

Disaster Declaration Request Missouri

- On May 1, Governor Mike Kehoe requested that President Donald Trump approve a major disaster declaration to provide Individual Assistance in response to the severe storms, tornadoes, and flooding that caused widespread destruction across the state from March 30 to April 8.
- Based on the documented damage, Governor Kehoe is requesting FEMA Individual Assistance for the following 20 counties: Bollinger, Butler, Cape Girardeau, Carter, Cooper, Dunklin, Howell, Iron, Mississippi, New Madrid, Oregon, Ozark, Reynolds, Ripley, Scott, Shannon, Stoddard, Vernon, Washington, and Wayne.
- According to the governor's office, six deaths were confirmed due to severe storms during that time.
- Joint damage assessments conducted by FEMA, SEMA, the U.S. Small Business Administration and local officials estimate more than \$25.5 million in emergency response costs and damage to public infrastructure.
