WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 25, 2025

Tropical Activity

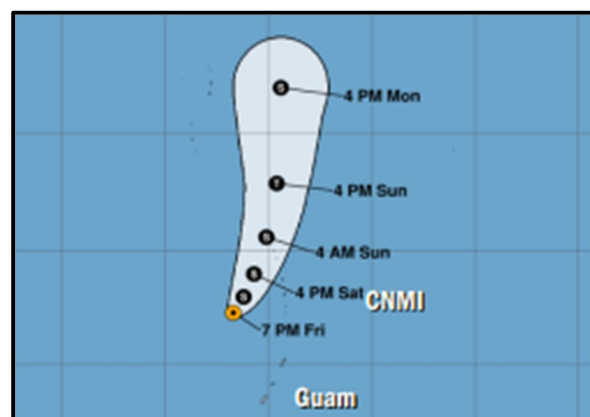

Atlantic – Disturbance 1

- A broad area of low pressure located 100 miles S of the coast of SW Louisiana continues to produce disorganized showers and thunderstorms.
- This system is moving west northwestward toward the Texas coast, and it has limited time to develop before it moves inland tonight.
- Regardless of formation, locally heavy rainfall is likely over portions of the northwestern Gulf coast during the next couple of days.
- Formation chance – 48 hour: Low (10%); 7-day: Low (10%)

Western Pacific – Tropical Storm Krosa

- Tropical Depression 12W strengthened into Tropical Storm Krosa Friday morning, prompting tropical storm warnings for the northern Commonwealth of the Northern Mariana Islands while bringing reduced rainfall expectations for Guam.
- Currently located 290 miles NNW of Guam moving NNW at 5 mph with maximum sustained winds of 45 mph.
- Rainfall amounts of 3 to 6 inches are possible across the region through Saturday, with locally higher amounts also possible.
- Sea and surf conditions remain dangerous throughout the Marianas, with elevated conditions along south, southwest and west-facing reefs and beaches.
