WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

October 13, 2023

Tropical Activity

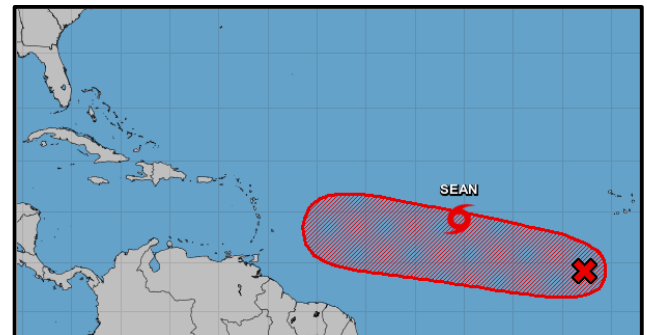

Atlantic – Tropical Storm Sean

- Tropical Storm Sean is centered about 1,100 miles west of the Cabo Verde Islands and has maximum sustained winds of 45 mph.
- Hostile conditions led to Sean weakening into a tropical depression late Wednesday night, but conditions became favorable for some development, and it became a tropical storm again on Thursday morning.
- The National Hurricane Center (NHC) said Sean is moving west-northwest at about 13 mph and is expected to continue toward the west-northwest or northwest during the next few days.
- The NHC says little change in Sean's strength is expected over the next few days. But by Sunday, what is left of Sean is expected to weaken and lose all of its tropical characteristics.

Atlantic – Disturbance 1 (AL94)

- Located several hundred miles SSW of the Cabo Verde Islands moving W.
- A tropical depression could form by middle of next week.
- Formation chance – 48-hour: Low (10%); 7-day: High (70%)
