WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 17, 2024

## Severe Weather Outlook

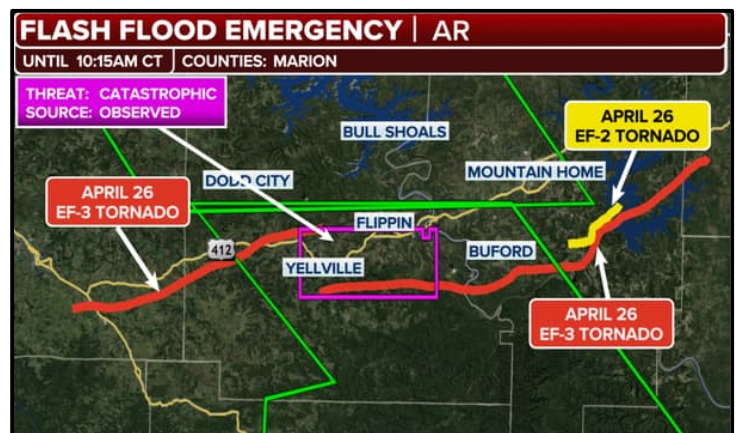

- Powerful and damaging thunderstorms that have been focused mostly on the Midwest in recent days will turn their attention to the eastern United States through midweek.
- Wednesday's severe weather threat is forecast to extend from New Brunswick southward to the Carolinas and northern Georgia, then westward to eastern portions of Kansas and Oklahoma.
- The AccuWeather Local StormMax™ wind gust for Wednesday's storms is 75 mph.
- Thursday, the overall intensity of severe weather may be somewhat reduced to a more sporadic nature.
- There will be at least some risk of locally damaging thunderstorms packing high winds and torrential downpours centered not only on the Carolinas but also much of Georgia and central and southern Virginia.
- Locally heavy and gusty thunderstorms may extend westward to parts of the lower Mississippi Valley as well Thursday.
- "A general 1-3 inches of rain is likely to fall from late this week to early next week," AccuWeather Meteorologist Elizabeth Danco said.
- "But where those downpours persist, amounts may reach or exceed 6 inches during the period."

## Severe Weather Activity

### Arkansas

- A Flash Flood Emergency was declared in a northern Arkansas town Wednesday as torrential rains led to rushing waters pouring into homes and prompting urgent evacuations.
- As much as 11 inches of rain have fallen near Yellville in central Marion County, leading to numerous washed-out bridges.
- "The whole town of Yellville is flooded," said Adam Stewart in a video shared with FOX Weather. "Pretty bad out here right now."
- The area, currently under a Flash Flood Emergency until 10:15 a.m. CT, was hit by two tornadoes back on May 26, the FOX Forecast Center notes.
