WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

June 21, 2023

## Tropical Activity

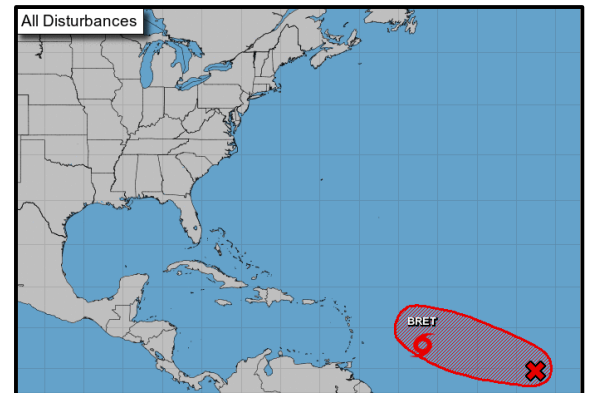

### Atlantic – Tropical Storm Bret

- Tropical Storm Bret has strengthened as it continues to head west across the tropical Atlantic Ocean, and it is expected to move across portions of the Caribbean islands after sunset on Thursday, according to the National Hurricane Center (NHC).
- As a result, the NHC has issued Tropical Storm Watches for Barbados, Dominica, Martinique and St. Lucia.
- As of Wednesday morning, Tropical Storm Bret was located in the central tropical Atlantic about 500 miles east of Barbados and the Windward Islands.
- Bret has maximum sustained winds of 60 mph and is moving west at about 16 mph.
- The NHC says some additional strengthening is possible before Tropical Storm Bret reaches the Caribbean late Thursday, but it's no longer expected to become a hurricane.

### Atlantic – Disturbance 1

- Located midway between the west coast of Africa and the Lesser Antilles moving W at 10-15 mph.
- Tropical depression will likely form during the next couple of days.
- This system is expected to move westward to west-northwestward at 10-15 mph across the central tropical Atlantic through the early part of the weekend.
- Formation chance - 48 hours: High (70%); 7-day: High (80%)
