WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 19, 2024

Severe Weather Outlook

- Weather conditions over the eastern United States through this weekend will be a tale of two regimes with dry and cool air across the north and humid air strewn with drenching downpours across the south, AccuWeather meteorologists say.
- Within the long-lasting mosaic of showers and thunderstorms forecast to extend from the central Gulf Coast to the southern Appalachians and the southern Atlantic coast, some areas will receive drought-easing moisture from frequent downpours.
- "A general 1-3 inches of rain is likely to fall from late this week through this weekend," AccuWeather Meteorologist Elizabeth Danco said, "But where those downpours persist, amounts may reach or exceed 6 inches during the period."
- Parts of the Carolina coast, southern Louisiana, and the southern Appalachians are most likely to receive close to 6 inches of rain.
- Some of the more intense downpours can bring rainfall rates of 1-2 inches per hour for a time, which is more than enough to lead to urban flooding problems.

Joint Preliminary Damage Assessments

State	Event	Number of Counties for IA		Start-End
		Requested	Completed	
MN	Flooding Jun 16	42	15	7/9-TBD
VT	Severe Storms & Flooding Jul 10-11	2	0	TBD
SD	Flooding Jun 16-Jul 8	14	0	7/16-TBD

Pending Individual Assistance Declaration Request
