WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

December 4, 2023

## Flash Flood Risk Pacific Northwest

- Flood fears in the Pacific Northwest are growing as rivers and streams in Washington and Oregon start to rise thanks to a series of atmospheric river storms that are delivering heavy rain to the region, which is now melting mountain snow and sending water into low-lying areas.
- The FOX Forecast Center said another strong storm system will move in Monday on the heels of the atmospheric river that impacted the region over the weekend.
- The heaviest rain will occur later Monday as the deepest moisture streams into the region off the Pacific Ocean. That stream of moisture will weaken slightly on Tuesday, but the most impactful part of the storm – river flooding – will just be getting started.
- The National Weather Service in Seattle said excessive rainfall is likely Monday and Tuesday, with 7-10 inches possible over the Olympics, 5-9 inches over the Cascades, 3-5 inches along the coast and up to 3 inches in the interior lowlands.
- The combination additional rain and the melting of the 2-4 feet of snow on the ground in the Cascade and Olympic Mountain ranges will send numerous rivers into flood stage, with some major flooding possible.
- Because of the flooding threat, Flood Watches have been posted in the Pacific Northwest from western Washington through western Oregon. This includes major cities in the region like Seattle and Olympia in Washington and Portland, Salem, Eugene and Medford in Oregon.

### Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied/Pending	Number of Counties
OH	Train Derailment Feb 3-8, 2023	7/3/2023	Pending	1 County
