WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

March 25, 2021

Severe Weather Outlook

- Over 50 million people are at risk of severe weather Thursday, from the central Gulf Coast through the Ohio River Valley, while a "tornado outbreak" is expected across the South.
- The Storm Prediction Center says there's a high chance of tornadoes -- a level 5 out of 5 -- for parts of the South. That's the worst and highest forecast outlook issued for severe storms. And while it's very rare for the SPC to issue this kind of outlook -- it's now the second time in a week for the South.
- The SPC warns of "several long-track tornadoes, destructive winds and very large hail forecast from the Lower Mississippi Valley, eastward across parts of the southeast and northward into the Tennessee and Ohio Valleys."
- Some of the widespread winds will be "hurricane force," the SPC said, while some areas can see hail that is "baseball size."
- More than a million people are under the high threat for tornadoes, including in cities like Decatur and Madison in Alabama and Florence in Mississippi.
- More than seven million people are in areas with moderate threat for tornadoes -- a level 4 out of 5 -- and those include Memphis and Nashville in Tennessee, Birmingham and Huntsville in Alabama and Jackson, Mississippi.
- And it's not just tornadoes: more than six million people were under a flash flood watch early Thursday spanning parts of Tennessee, Alabama, Georgia and North Carolina. Rainfall of up to four inches is expected in the region, with some areas seeing higher amounts.
- Into the overnight hours of Thursday, the storms are expected to evolve into a line as it tracks into parts of Alabama and Georgia.
- By Friday, most of the South should dry out except for parts of Georgia and the Carolinas, where weakening showers and isolated thunderstorms could linger.

Joint Preliminary Damage Assessments

State	Event	Number of Counties for IA		Start-End
		Requested	Completed	
HI	Severe Weather, Flooding and Landslides March 8-15, 2021	2	2	3/22-3/23
