July 7, 2025

Tropical Activity

Tropical Depression Chantal

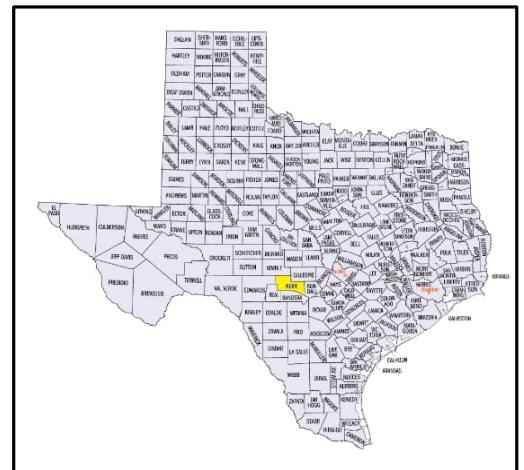

- More than 5 million people were under flood alerts in North Carolina and Virginia with nearly 2 million under Flash Flood Warnings after Chantal made landfall early Sunday.
- Now a Tropical Depression, Chantal was the first named storm of the 2025 Atlantic hurricane season to hit the United States, flooding properties and prompting rescue efforts.
- The National Hurricane Center warned of flash flood concerns across parts of northern North Carolina late Sunday and Virginia into Monday. Life-threatening surf and rip currents are expected to continue at beaches from northeastern Florida to the mid-Atlantic states, the center said.
- Widespread flash flooding was ongoing across much of North Carolina's Orange, Alamance and Chatham counties Sunday evening "as rainfall amounts of 4 to 7 inches have been observed in the area with localized amounts in excess of 8 inches," the National Weather Service said Sunday night.
- "Numerous water rescues have occurred this evening and some homes flooded." The Eno River, which runs through Orange and Durham counties in North Carolina, rose around 20 feet in about four hours Sunday evening, according to the National Weather Service.
- Chantal came ashore around 4 a.m. ET Sunday near Litchfield by the Sea, South Carolina, according to the hurricane center, about 10 to 20 miles south of Myrtle Beach. The tropical storm was packing sustained winds between 50 and 60 mph at landfall, with stronger gusts.

Disaster Declaration Activity

DR-4879 Texas

- On July 3rd, the National Weather Service advised of potential flooding and then sent out a series of flash flood warnings in the early hours of Friday before issuing flash flood emergencies — a rare alert notifying of imminent danger.
- The disaster struck along Texas' Guadalupe River after a "deadly flood wave" sent a 20-foot wall of water several miles downstream on the Fourth of July.
- A cluster of thunderstorms sat parked over the region Thursday night into early Friday morning, dumping 12-15 inches of rain in just hours around San Angelo and triggering a Flash Flood Emergency.

WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 7, 2025

- The surge measured 20 feet in just an hour at Kerrville and nearly 27 feet in Comfort, Texas, in just 45 minutes, taking the river from normal levels to historic levels not seen in nearly a century before many had time to react.
- The threat of more heavy rain and flooding looms over central Texas Monday, as hundreds of emergency workers and volunteers continue their search to find people swept away in the historic flooding there.
- The floods have now claimed at least 82 lives across six counties. At least 850 people were rescued or evacuated but the hope of finding more survivors is dwindling.
- In a statement on July 6, the Trump administration approved a disaster declaration for Texas "to supplement recovery efforts in the areas affected by severe storms, straight-line winds and flooding from July 2, 2025, and continuing" for "affected individuals in Kerr County.

Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied/ Pending	Number of Counties/Tribes
MI*	Severe Winter Storm	5/16/2025	Pending	11 Counties
OR	Severe Storms, Flooding, Landslides, Mudslides	5/19/2025	Pending	3 Counties
