WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

January 7, 2025

Fire Weather Warning Southern California

- Dire warnings have been issued for the Los Angeles area after forecasters say there is the potential for the strongest wind event in more than a decade.
- A "life-threatening, destructive, widespread windstorm" is expected Tuesday afternoon through Wednesday morning, Los Angeles forecasters at the National Weather Service said.
- Damaging winds are expected across most of Los Angeles and Ventura counties, leading to widespread power outages.
- The strongest winds will blow through Southern California from Tuesday evening through Wednesday afternoon, with gusts peaking near 80 mph.
- Isolated areas in the mountains and foothills will see gusts of 80-100 mph.
- Widespread damaging winds and low humidity are also leading to extreme fire concerns across most of Los Angeles and Ventura counties.
- NWS Los Angeles said that Tuesday's windstorm has the potential to be the strongest wind event since 2011.
- Winds are forecast to die down by Wednesday evening, a renewed threat of strong winds returns to the region on Friday.

Pending Individual Assistance Declaration Request
