WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 22, 2024

## Flood Risk

- Rounds of heavy rain and thunderstorms will continue to pound the southern U.S. this week, increasing the risk of flash flooding from the Southwest to the Southeast and into parts of the mid-Atlantic.
- The flood risk comes as a nearly stalled-out cold front continues to hang out across the region, and that's helping to produce the potentially record-breaking rain.
- In terms of rainfall totals, it appears at this point that areas along the Gulf Coast from Texas to Louisiana can expect the highest rainfall totals.
- Central and South Texas are most at risk of seeing higher totals, with cities like Austin and Houston potentially seeing 3-5 inches of rain through at least the middle of the week.
- Southern Louisiana and the New Orleans area could also see higher rainfall totals this week.

## Joint Preliminary Damage Assessments

State	Event	Number of Counties for IA		Start-End
		Requested	Completed	
VT	Severe Storms & Flooding Jul 10-11	2	0	TBD
