WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

January 21, 2026

Winter Weather Outlook Southern Plains

- A major winter storm is forecast to take shape in the Southern Plains on Friday.
- The storm will start out west and will enter the Southern Plains with locals beginning to experience the initial impacts by as early as Friday afternoon.
- Winter Storm Watches are now in effect across portions of Texas, Oklahoma, Arkansas, New Mexico, Missouri and northern Louisiana, and will remain in place from Friday through Saturday.
- During the overnight hours Friday into early Saturday, widespread icing is expected from Midland, Texas, through Dallas and Shreveport, Louisiana, and into southern Arkansas.
- Central Oklahoma through northern Arkansas and into Tennessee will receive the highest snowfall totals.
- A wide swath of 5-8 inches looks likely with some bigger totals across Oklahoma where they could exceed over a foot.
- The heaviest snow and ice are expected from Saturday morning through midday Sunday.
- Through Sunday, a high impact swath of ice accretion is possible, with a bullseye of 0.50 inches or more of ice from far eastern Texas through southern Arkansas and into northwestern Mississippi.
- Locations from west Texas through Dallas may see around 0.25 to 0.50 inches of ice.
- Widespread power outages are likely in these areas.
