WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

March 9, 2026

## Severe Weather Activity Central U.S.

- Another round of severe storms targets the Heartland by mid-week, bringing renewed chances for strong winds, damaging hail and possible tornadoes.
- This will come just on the heels of a deadly, multi-day severe weather outbreak that ripped through Texas, the Plains, and the Midwest before it charged towards the Great Lakes and the Northeast.
- Portions of those areas will see another chance for severe storms on Tuesday, continuing into the evening.
- The deadly storm system spanned more than 1,500 miles—from the Northeast to Texas—and impacted over 90 million people.
- At least 12 tornadoes ripped through the Heartland between Thursday and Saturday, ranging in strength from EF-0 to EF-3, claiming the lives of eight people.
- An upper-level disturbance over northwest Mexico is forecasted to move northeast into the Southern Rockies and eventually the High Plains on Tuesday.
- A separate system moving across the northern U.S. will intensify over the central part of the country, and when these two systems start to interact, winds higher in the atmosphere will pick up from the southwest.
- With the storms that form Tuesday afternoon potentially becoming supercells, large to very large hail is possible.
- The areas from parts of Missouri into Illinois within the Level 3 out of 5 threat will see the highest tornado threat.

## Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied/Pending	Number of Counties/Tribes
IL*	Severe Storms and Flooding July 25 - 28, 2025 (Appeal)	11/21/2025	Pending	3 Counties

\*Award of task order to contractor pending
