WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

January 22, 2026

Winter Weather Outlook Northeastern U.S.

- As we inch days closer to the formation of a major snowstorm, the newest forecasts are coming into agreement that the Northeast will feel the effects of the season's strongest winter weather event.
- A powerful storm carves a dangerous 2,000-mile-long path east across the U.S., packing heavy snow and dangerous ice across the region.
- Major Northeast cities from New York City, Philadelphia, Washington D.C. and Boston, are staring down the barrel of what could be the biggest major snowstorm in years.
- Over 200 million Americans across more than 35 states will feel the impacts of the brewing winter storm that is forecasted to punish several regions with potentially catastrophic impacts.
- After forming in the Southern Plains on Friday, forecast trends predict the major winter storm will track to the north and slam the Northeast corridor.
- The storm is forecasted to reach the Mid-Atlantic and Northeast Saturday evening, and peak Sunday before coming to an end Monday.
- The first impacts will arrive in Virginia on Saturday afternoon from the west.
- The storm will peak in intensity through the day Sunday, when snow rates may be as high as 1 inch per hour before winding down.
- According to the FOX Forecast Center, the biggest snow totals in the Mid-Atlantic and Northeast include areas from the Potomac Highlands of West Virginia, through northern Virginia and Washington D.C., Maryland and Virginia (DMV) area, and up toward the New York Tri-State area.
