WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

March 21, 2025

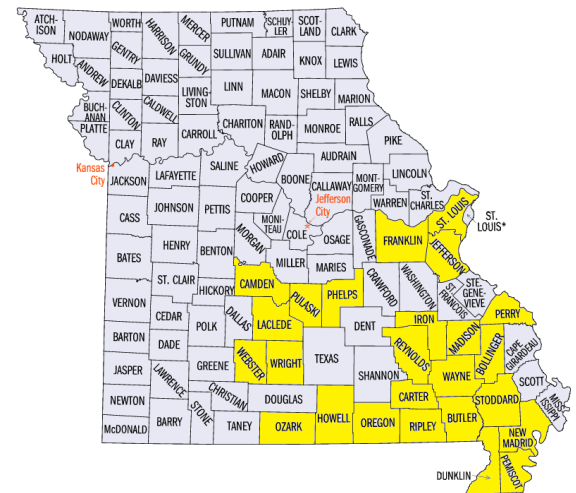

## Severe Weather Outlook Midwest & South

- Severe weather is forecast to pose threats to portions of the southern Plains and the Mississippi Valley this weekend, only one week after a deadly tornado outbreak struck the region.
- The area from eastern Kansas to Missouri and far western Illinois is most likely where some thunderstorms could become severe, mainly with hail, torrential downpours and strong wind gusts.
- As the pattern continues to evolve and more warm, humid air is drawn in from the Gulf, the severe weather threat will expand farther east and south on Sunday over the Mississippi Valley.
- The risk of severe weather from Sunday-to-Sunday night will extend across portions of Illinois, Indiana, Kentucky, Tennessee, Georgia, Alabama, Mississippi, Arkansas, Louisiana, Texas, Oklahoma and Missouri.
- The main threats will be strong wind gusts of 60-70 mph, hail and flash flooding downpours. A few tornadoes may also be spawned by the strongest storms.

## Severe Weather Activity Missouri (March 14-15)

- On March 18th, Governor Mike Kehoe expanded his request to the Federal Emergency Management Agency (FEMA) for joint preliminary damage assessments (PDAs) for Individual Assistance to include Dunklin and Madison counties.
- The previous day, the Governor requested that FEMA participate in joint PDAs in 23 counties following the March 14-15 severe storms that brought destruction to many parts of the state. The requests begin the process of obtaining federal disaster assistance.
- Joint PDAs have now been requested for the following 25 counties: Bollinger, Butler, Camden, Carter, Dunklin, Franklin, Howell, Iron, Jefferson, Laclede, Madison, New Madrid, Oregon, Ozark, Pemiscot, Perry, Phelps, Pulaski, Reynolds, Ripley, St. Louis, Stoddard, Wayne, Webster, and Wright.
- Initial damage assessments now estimate approximately 369 houses were destroyed, 366 sustained major damage and over 1,000 have minor damage.
