WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

February 21, 2025

## 2025 Hurricane Season

- The 2025 Atlantic hurricane season officially begins June 1 and will run for 183 days through Nov. 30.
- Looking ahead to the 2025 season, early outlooks from various weather organizations suggest an average to slightly above-average season.
- In late 2024, the world entered a La Niña phase.
- This climate pattern is often linked to greater storm activity in the Atlantic basin, but the pattern is expected to wane in 2025.
- This will lead the world back to a neutral status of ENSO.
- Historically, neutral ENSO years have produced a range of hurricane activity, from a below-average number of cyclones to well above-average seasons.
- Depending on variables such as sea surface temperatures, wind patterns and other atmospheric factors.
- According to research conducted by experts at Florida State University, impacts from hurricanes during neutral years are heightened for the Florida Peninsula and the Gulf Coast.
- The East Coast tends to experience reduced tropical cyclone activity during neutral events.
- The Caribbean sees impacts that are considered to be about average.

## Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied/Pending	Number of Counties/Tribes
OK	Severe Storms, Straight-line Winds, Tornadoes, and Flooding	12/20/2024	Pending	6 Counties
