WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

October 8, 2025

Tropical Activity

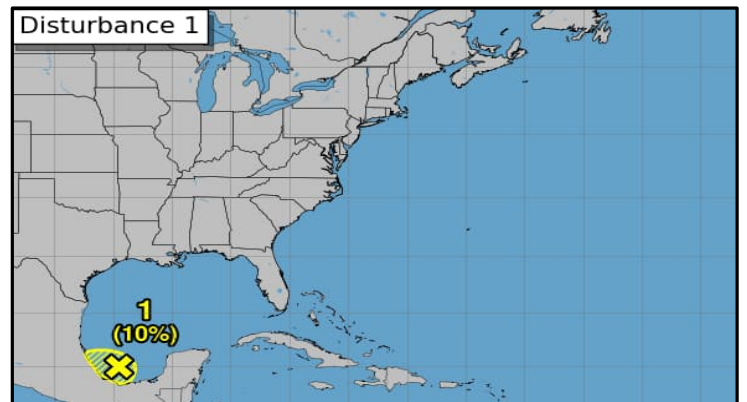

Atlantic – Tropical Storm Jerry

- Tropical Storm Jerry formed in the Atlantic on Tuesday.
- Jerry is continuing to gain strength and is forecast to become a hurricane as it approaches the Leeward Islands.
- On Thursday, 2-4 inches of rain are expected across the Leeward Islands.
- The U.S. and British Virgin Islands as well as other nations in the Northern Leeward Islands should monitor Jerry's progress.
- Tropical Storm Jerry has maximum sustained winds of 50 mph with some higher gusts, and strengthening is expected over the next few days.
- Currently located less than 900 miles to the east-southeast of the northern Leeward Islands and was moving off to the west-northwest at 23 mph.
- General motion is forecast to continue with a decrease in forward speed over the next few days, followed by a turn to the north-northwest and north on Friday.

Atlantic – Disturbance 1

- Disorganized showers and thunderstorms continue with a trough of low pressure moving westward across the Bay of Campeche.
- Some slow development of this system is possible before it moves inland over southern Mexico later today or early Thursday.
- Areas of heavy rain and gusty winds are likely across portions of southern Mexico during the next day or so.
- Formation chance through 48 hours: Low (10%); 7 days: Low (10%)
