WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 5, 2024

Tropical Activity

Atlantic - Hurricane Beryl (CAT 2)

- Beryl made landfall along Mexico's Yucatan Peninsula as a Category 2 on the Saffir-Simpson hurricane wind scale early Friday morning just northeast of Tulum.
- Beyond the Yucatan Peninsula, Beryl will emerge over the warm waters of the south-western Gulf of Mexico.
- Currently, Beryl is expected to make another landfall near the Texas and Mexico border Sunday evening to early Monday.
- AccuWeather meteorologists believe that Beryl may regain hurricane intensity after spending some time as a tropical storm from Friday to Saturday.
- Rip currents could cause life-threatening beach conditions beginning late today and continuing through the weekend across much of the Gulf coast.
