WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

April 14, 2021

Severe Weather Activity Louisiana

- Thousands are still without power after thunderstorms brought heavy rain and winds to southeast Louisiana on Tuesday, with another round expected on Wednesday, possibly less severe and for less amount of time.
- The National Weather Service in New Orleans says the storms with wind gusts of up to 50 mph produced torrential rainfall in parts of Jefferson, Lafourche, and Plaquemines parishes.
- According to the Entergy Louisiana outage map, as of 5:30 a.m. more than 3,500 customers in Jefferson Parish were without power and more than 5,300 are without power across Louisiana.
- Rescue teams are searching for 12 missing people after a sudden 'microburst' storm with up to 112 mph winds capsized a boat off the coast of Louisiana Tuesday.
- Rounds of thunderstorms are forecast to continue to impact the area into late week, complicating search and rescue efforts and keeping the danger of sudden squalls impacting mariners high in the Gulf of Mexico waters.
