WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

April 23, 2024

## Severe Weather South Carolina

- Severe thunderstorms brought a massive hailstorm to the Carolinas on Saturday, blasting out windows, tearing down fences and leaving yards covered in enough ice to create the appearance of a fresh blanket of snow.
- A Severe Thunderstorm Warning was in effect for Rock Hill, Fort Mill and Tega Cay in South Carolina on Saturday at 4:45 p.m. ET.
- Late in the afternoon on April 20, the storm rolled into the city, knocking out power to 7,000 electric customers, Rock Hill officials said.

About 800 still didn't have power as of 4 p.m. April 22.

- Teams with the National Weather Service office in Greenville-Spartanburg, South Carolina, conducted surveys on Monday in Rock Hill and York to assess the damage from Saturday's severe thunderstorms.
- Damage assessments reveal extensive property and vehicle damage.
- Drone video recorded over the Roddey Park neighborhood in Rock Hill showed the extent of property damage from downed fences to cars and roofs with blue tarps.
- The National Weather Service confirmed on Monday that investigators in Rock Hill did not find evidence of a tornado after strong storms moved through over the weekend.
- Straight-line winds got as high as 90 mph and hail from Saturday's storms caused widespread damage including the city of York, through Rock Hill, and to the Lancaster County line.
- There was very large hail ranging from 2 to 2.75 inches (hen-egg to baseball size) that was being driven by the wind.
