WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

December 12, 2022

Severe Storm Outlook

- A severe weather outbreak is expected to impact parts of the South in the week ahead on the warm side of a coast-to-coast storm tracking across the U.S.
- The powerful storm got underway over the weekend when a large upper-level low-pressure system buried many western mountains in feet of snow.
- A strong cold front associated with the area of low pressure will sweep east from the southern Plains into the lower Mississippi Valley and northern Gulf Coast between Monday night and Thursday.
- That front will provide the trigger for thunderstorm development as it pushes through a warm, humid air mass engulfing these regions.
- This is all associated with the same coast-to-coast storm that's also expected to spawn a northern Plains blizzard and possibly even a snowstorm in the Northeast toward the end of the workweek.
- An initial round of thunderstorms overnight Monday could turn strong to severe from portions of western and central Kansas southward to Oklahoma and western North Texas.
- Damaging wind gusts, isolated large hail and a couple of brief tornadoes are all possible.
- Tuesday is expected to have the highest threat of severe weather in this potential outbreak. The locations at risk of severe thunderstorms will stretch from East Texas into southern Arkansas, Louisiana and western and southern Mississippi. That includes Alexandria, New Orleans and Shreveport in Louisiana, as well as Jackson in Mississippi.
- As this system moves farther east, additional severe thunderstorms are expected to fire up Wednesday from southeastern Louisiana into southern Mississippi, southern Alabama, southwestern Georgia and the Florida Panhandle.
- The storm system will slide into the Southeast on Thursday, spawning one final day of severe storms from southern South Carolina to parts of South Georgia and Florida.
- A couple of tornadoes, damaging winds and large hail will all be a concern for cities such as Savannah in Georgia and Jacksonville, Orlando, Tallahassee and Tampa in Florida.
