WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

March 10, 2025

## Severe Weather Outlook South

- Tens of millions of Americans from the Midwest to the Southeast are going to have another tense week as concerns grow that the U.S. could be rocked by another multiday severe weather outbreak.
- The FOX Forecast Center said the severe weather potential might increase on Wednesday across the Ark-La-Tex region.
- There is still some uncertainty regarding the system's strength and positioning.
- One computer forecast model shows a more intense system with strong upper-level winds, which could enhance storm development. Another model shows a weaker system, which would limit storm coverage.
- Moisture from the Gulf is expected to move into portions of Texas and the Ark-La-Tex region.
