WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

April 10, 2025

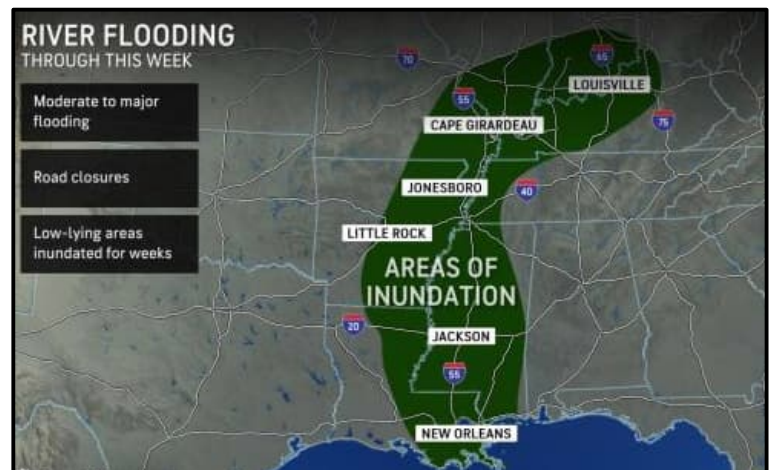

Severe Weather Outlook Southern U.S.

- The FOX Forecast Center said clusters of thunderstorms are expected to break out across portions of the mid- and Deep South and Tennessee Valley on Thursday.
- While there is a renewed risk of powerful storms, the threat isn't as high as it was ahead of last week's deadly severe weather outbreak.
- More than 34 million people will be at risk of severe storms Thursday.
- This includes cities such as Memphis and Chattanooga in Tennessee, Birmingham and Huntsville in Alabama and Atlanta in Georgia.
- The main threats from storms that develop on Thursday will be damaging wind gusts and large hail, but a few tornadoes cannot be ruled out.

River Flooding

- Torrential rains have long since ended over the Tennessee, Ohio and Mississippi river basins, but runoff from the 8-16 inches of rain that fell over just a few days will continue to surge into the largest rivers and lead to moderate to major flooding.
- The amount of rain that fell over a four-day stretch was rare, with a likelihood of occurring once every 100 to 1,000 years over a broad area, based on the historical average.
- "AccuWeather experts estimate that the economic loss from the severe weather and flooding in recent days in the middle of the nation is between \$80 billion and \$90 billion," said Chief Meteorologist Jonathan Porter. "Unless property owners have specific flood insurance, losses and repairs will most likely not be covered by standard policies."
- As of Wednesday morning, 24 river gauge sites were at major flood stage, and 122 locations across the central U.S. were at or above flood stage, spanning multiple rivers and tributaries.
- Water levels on the small streams and most secondary rivers will begin to drop in the coming days. However, the number of locations on the largest rivers — such as the lower portion of the Ohio and lower Mississippi — will reach a major flood stage. A crest is not expected on the lower end of the Mississippi until late in the third week or during the fourth week of April.
