WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

March 31, 2025

Severe Weather Outlook Eastern U.S.

- Strong to severe thunderstorms packing threats of damaging wind gusts and a few tornadoes are expected Monday.
- Portions of the Northeast southwestward to the central Gulf Coast region, threatening both the morning and evening commutes.
- Storms are already ongoing near the Gulf Coast and parts of the Southeast, with additional development expected farther north throughout the day, the FOX Forecast Center said.
- The severe weather threat will continue into Monday evening before the storms weaken as they move offshore.
- The highest concentration of wind damage is forecast to be centered over parts of the Carolinas, Georgia, Alabama, southern Mississippi and the Florida Panhandle.
- A notable threat extends up much of the East Coast, including major cities along the Interstate 95 corridor such as Washington, Baltimore, Philadelphia and New York City.

Severe Weather Activity Central & South U.S.

- Powerful storms stretched from Lower Michigan down to eastern Texas and northern Louisiana, unleashing damaging winds, large hail and tornadoes.
- Sunday saw an intense period of activity, with over 70 Tornado Warnings issued and nearly 400 storm-related incidents reported.
- This made it the second-most active day for severe weather this year, behind only March 14 when there were over 600 reports.
- As of Monday morning, more than 100,000 residents were without power, and they were bracing for the possibility of additional thunderstorms.
- Severe storms produced wind gusts as high as 96 mph in Jackson, Michigan, 85 mph near Hoopston, Illinois, 81 mph in Cascade Township, Michigan, and 81 mph in Valparaiso, Indiana.
- Flash Flood Emergencies were issued Sunday afternoon for parts of northern Jackson County in southern Mississippi after emergency management reported that roads were impassable.
- According to the NWS, between 6 and 8 inches of rain had fallen, and an additional 2-4 inches was possible.
