WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 14, 2020

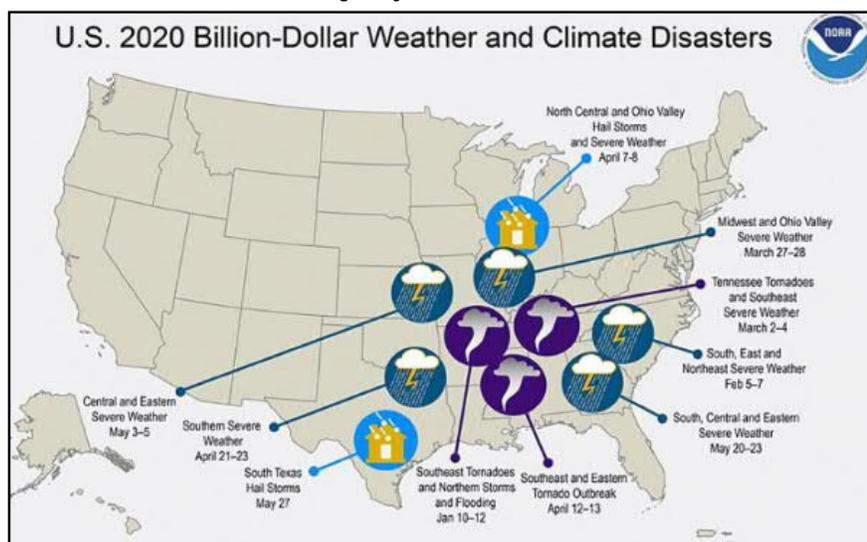

Severe Weather Outlook

- The same cold front that set off explosive storms across the central Plains Monday and Monday night will dig eastward on Tuesday.
- Storms can erupt along a wide swath of the country from the Front Range of the southern Rockies to the Upper Midwest.
- Severe activity will start to ramp up in earnest by Tuesday afternoon when lines of damaging thunderstorms called squall lines can begin to organize and rumble across the nation's midsection through Tuesday night.
- Along with torrential rainfall and large hail, very strong and damaging wind gusts are likely to be produced by these storms. Even an isolated tornado or two can develop across the area.
- Locations that may end up in the path of Tuesday's damaging storms include Madison, Wisconsin; Des Moines, Iowa; Omaha, Nebraska; and Dodge City, Kansas.

U.S. reaches 10th billion-dollar weather disaster by end of June 2020

- Halfway through 2020 and the billions of losses from weather disasters have added up for another year in a row.
- The National Oceanic and Atmospheric Administration (NOAA) said last week that through the end of June 2020, 10 separate billion-dollar disasters were recorded in the country.
- "This makes 2020 the sixth consecutive calendar year where 10 or more billion-dollar weather events occurred — a new record, according to experts from NOAA's National Centers for Environmental Information," the agency stated.

DAILY DART

WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 14, 2020

- The 10 disasters so far in 2020 were all due to severe storms that unleashed tornadoes, damaging winds and hail across more than 30 states, from the Great Lakes to the Gulf Coast.
- A total of 80 people have died in weather disasters since January.
- The deadliest and greatest amount of damage, estimated at \$3 billion, was reported over Easter Sunday and the following Monday when an outbreak of at least 140 tornadoes from Texas to Maryland was reported, including 3 EF-4s, 12 EF-3s, 20 EF-2s, 77 EF-1s, and 28 EF-0s.
- An analysis of tornado destruction so far this year also shows that it's been dark during several of the tornadoes.
