WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 23, 2020

Tropical Activity

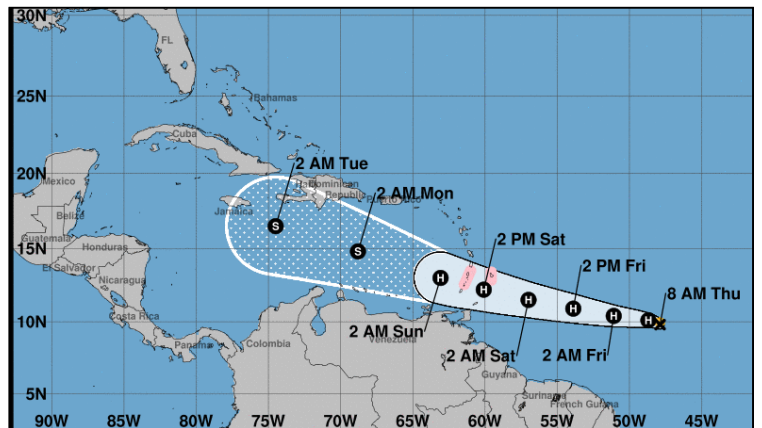

Atlantic – Tropical Depression Eight

- The depression is expected to strengthen and it could bring tropical-storm-force winds to portions of the Texas coast, where a tropical storm watch has been issued.
- The center of this tropical system is currently forecast to move inland near Victoria, Texas by Saturday morning.
- The depression is expected to produce heavy rains across the portions of Louisiana and southern Texas. These rains could result in flash flooding.
- Maximum Sustained Wind: 30 mph
- Movement: west-northwest at 9 mph

Atlantic – Tropical Storm Gonzalo

- Tropical Storm Gonzalo, which formed Wednesday, is expected to become the first hurricane of the Atlantic season on Thursday.
- Gonzalo, moving at 12 mph, is about 910 miles east of the southern Windward Islands with maximum sustained winds of 65 mph, according to the National Hurricane Center. A turn toward the northwest direction is expected Saturday.
- A hurricane watch has been issued for Barbados, as Gonzalo is expected to strengthen into a hurricane over Thursday and peak at a Category 1, CNN meteorologist Robert Shackelford said.
