WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

August 3, 2020

## Tropical Activity

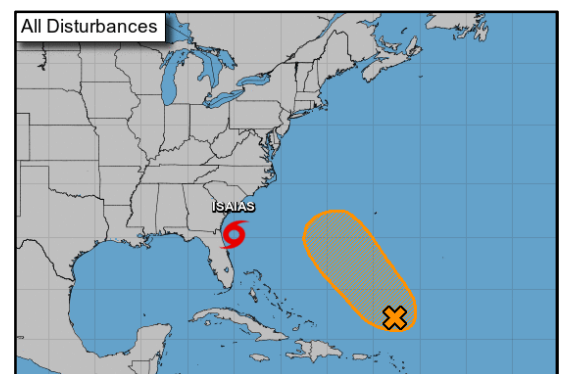

### Atlantic – Tropical Storm Isaias

- Isaias is currently centered just off of Florida's northeast coast.
- Expected to regain hurricane strength before it pushes ashore into the Carolinas later Monday with strong winds, flooding rainfall and storm surge flooding.
- The storm will then spread its impacts up the East Coast as far north as New England through Tuesday night.
- A hurricane warning has been issued for a portion of the upper South Carolina and lower North Carolina coasts.
- The hurricane warning includes Myrtle Beach, South Carolina, and Wilmington, North Carolina.
- Tropical storm warnings extend as far north as Watch Hill, Rhode Island. Tropical storm watches extend as far north as Maine.
- Dangerous storm surge flooding is possible in parts of the Carolinas. A storm surge warning has been issued from Edisto Beach, South Carolina, to Cape Fear, North Carolina.
- A storm surge of 3 to 5 feet, above ground level, is expected if peak surge occurs at the time of high tide on the upper South Carolina and southeast North Carolina coasts.
- According to the National Weather Service, the high tide Monday evening could hit major flood stage in Charleston, South Carolina.
- An isolated threat is possible beginning late Monday and early Tuesday from eastern South Carolina into eastern North Carolina and far southeast Virginia.

### Atlantic – Disturbance 1

- Located a few hundred miles north of the northern Leeward Islands.
- Marginal environmental conditions could allow for some slow development of this system during the next several days, with a tropical depression possibly forming later this week.
- This system is forecast to move northwestward at about 15 mph over the southwestern Atlantic today and on Tuesday, and then stall several hundred miles southwest of Bermuda by the middle to latter part of the week.
- Formation chance through 48 hours (40%)
- Formation chance through 5 days (60%)

## Hurricane Hanna Aftermath

### Texas

- The Rio Grande Valley continues dealing with the aftermath of Hurricane Hanna.
- Risk Management Solutions Inc. (RMS), has estimated that insurance losses in the U.S. from Hurricane Hanna will not exceed \$400 million.
- This estimate represents insured losses associated with wind and storm surge, including losses to the National Flood Insurance Program (NFIP).
- RMS' estimate includes property damage and business interruption from wind and storm surge-driven coastal flooding to residential, commercial, industrial, and automobile lines of business.
- IA PDAs continue in 6 counties: Aransas, Bexar, Cameron, Hidalgo, Nueces and Willacy.
