WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

July 27, 2023

Tropical Activity

Atlantic – Disturbance 1

- The extremely defuse Tropical Disturbance that moved off the African coast at the beginning of the week has a chance of developing in a few days.
- For now, it's embedded in a dense plume of Saharan dust, which is keeping thunderstorms to a minimum. There are so few clouds and showers with the system that it's hard to pick out where the center is currently located.
- Over the weekend or early next week, the consensus of the various computer forecasts is that the system will break free of the densest part of the dust plume and gather enough moisture to develop into at least a tropical depression.
- A blocking high-pressure system to the north is currently propelling the disturbance on a westerly path, but a break in the high should allow a northward turn over the weekend.
- Formation chance – 48 hour: Low (near 0%); 7-day: Medium (40%)

Joint Preliminary Damage Assessments

State	Event	Number of Counties for IA		Start-End
		Requested	Completed	
PA	Flash Flooding	2	0	TBD
IL	Severe Storms & Flash Flooding	1	0	7/24-TBD
NJ	Severe Storms & Flooding	1	0	TBD

Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied/ Pending	Number of Counties/Tribes
OH	Train Derailment Feb 3-8, 2023	7/3/2023	Pending	1 County
TN	Severe Storms & Straight-line winds June 25-26	7/20/2023	Pending	1 County
