WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

November 22, 2023

Tropical Activity

Atlantic – Disturbance 1

- The National Hurricane Center (NHC) is watching an area for possible tropical development as the end of the 2023 Atlantic hurricane season nears.
- An area of low pressure is expected to develop along a frontal boundary over the central subtropical Atlantic Ocean in a day or so.
- The non-tropical low is expected to move to the southeast across the central subtropical Atlantic over warmer ocean water during the next few days.
- Environmental conditions could allow the system to gradually acquire tropical or subtropical characteristics.
- The NHC says a subtropical or tropical storm could form late this week or over the weekend as the system turns to the northeast.
- If the storm earns a name, it will become Vince, the second-to-last name on the 2023 Atlantic naming list.
- Formation chance – 48-hour: Low (20%); 7-day: Medium (50%)

Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied/Pending	Number of Counties
OH	Train Derailment Feb 3-8, 2023	7/3/2023	Pending	1 County
