WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

June 23, 2022

Tropical Activity

- The National Hurricane Center is monitoring a tropical wave over the eastern Atlantic.
- The wave is producing a group of disorganized storms at this time. It could hit conditions that allow it to develop into a system early next week.
- The path of the wave would bring it towards the northern coast of South America.
- The storm has no chance of developing in the next two days, but a 20% chance of developing over the next five days, according to the National Hurricane Center.

Severe Storms and Tornado Activity

Virginia

- The National Weather Service issued a Severe Thunderstorm Warning for several areas in central Virginia Wednesday afternoon, and with the weather came massive damages across the region.
- Thunderstorms knocked down a tremendous amount of trees in Fredericksburg, Virginia and neighboring Spotsylvania and Fauquier Counties. Warrenton was also hit hard.
- More than 70,000 customers in the metro Richmond and Tri-Cities areas reported power outages on Wednesday, June 22. The outages were caused by recorded high winds of up to 60 miles per hour, fallen trees and downed power lines.
- One apartment building in Richmond even had its roof ripped off amid the severe weather.
- Roads were still blocked and power outages continued Thursday morning.
