WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

March 29, 2022

Severe Weather Outlook

- Areas from central Texas to southeastern Nebraska and southwestern Iowa are advised to remain on alert through Tuesday night.
- "Portions of central and northern Texas, as well as Oklahoma and Kansas, can be in the bull's-eye of the isolated tornado risk," warned AccuWeather Meteorologist Mary Gilbert.
- These thunderstorms, severe or not, can also produce torrential downpours that can trigger flash flooding and reduced visibility on roadways.
- The threat of severe weather and downpours will continue traveling eastward Wednesday and Wednesday night into areas from eastern Texas to the Florida Panhandle and as far north as southern Illinois.
- Severe thunderstorms are likely to impact some of the same areas that were slammed with severe weather just last week on March 22, and experts are warning residents to be prepared for more dangerous storms.

Tornado Activity (March 21-23, 2022)

Mississippi

- The Mississippi Emergency Management Agency continues to compile damage assessments related to Mar. 22 severe weather.
- As of Monday, the National Weather Service Jackson has confirmed 25 tornadoes swept across the state.
- Three injuries were reported to MEMA due to the storms (Clay, Copiah, and Holmes).
- The agency has collected preliminary damage reports, which are subject to change. MEMA said sixteen counties have reported damage, with 252 homes affected.
- At this time, 22 are classified as destroyed, and 34 are considered to have major damage in Attala, Clay, Hinds, Holmes, Jefferson, Kemper, Madison, Smith, Warren, and Yazoo counties.
