WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

May 14, 2021

Severe Weather Outlook

- AccuWeather meteorologists are monitoring the potential for rounds of flooding rainfall and severe weather that are expected to erupt across portions of the Plains this weekend into early next week.
- After a below-average number of tornadoes in the month of April 2021, conditions are coming together for an active severe weather pattern in mid-May.
- There were just 73 tornadoes reported across the United States in April, well short of the three-year average for the month of 224, according to the Storm Prediction Center.
- May has already produced more than 100 tornado reports.
- "A series of weak disturbances are expected to track eastward from the Rockies and into the Plains Friday through the weekend," AccuWeather Senior Meteorologist Brett Anderson said.
- These storms will be capable of producing hail and strong wind gusts that could potentially reach an AccuWeather Local StormMax™ of 70 mph.
- "Storms will continue to move across the Midwest into the weekend as warm and increasingly humid air advances northward through the southern Plains and clashes with cooler air farther north," Anderson said.
- There is the potential for flash flooding, especially where heavy downpours repeatedly move over the same areas. "Some locations may end up with up to 8 inches of rainfall over a three-day period and the strongest storms may produce locally damaging wind gusts, especially over the southern half of Kansas and Missouri," Anderson said.
- Along with the flooding threat and surge in humidity levels across the Midwest and southern Plains this weekend, another area of severe thunderstorms will erupt across much of the same area that is expected to receive robust storms Friday.
- This storm will bring the threat for severe weather from portions of western Texas into southwestern Kansas.
- As the weekend comes to a close, a potent storm is expected to move into the southern and central Plains early next week.

Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied /Pending	Number of Counties/Tribes
