WSP USA INSPECTION SERVICES DISASTER AWARENESS REPORT

March 8, 2023

## Severe Weather Outlook

- Winter Storm to bring flood, severe thunderstorm potential in the South.
- "Warmer conditions on the southern side of the storm will keep states from Texas to Tennessee from experiencing snow. However, the storm could still bring impactful weather," AccuWeather Senior Meteorologist Courtney Travis said.
- AccuWeather meteorologists are most concerned about the zone from near Dallas to Little Rock, Arkansas; Nashville, Tennessee; and Atlanta, where at least two rounds of downpours through the end of the week can raise flash flood concerns.
- "Widespread rainfall amounts of 1-2 inches are possible in this zone, but it's not out of the question that a few isolated locations could report more like 3 or 4 inches by Friday," Travis said.
- Some areas in this corridor have already picked up 3-5 inches of rain over the past week, further heightening the risk of flash flooding as a result of the saturated ground.
- Thunderstorms could turn feisty during a few days of the wet pattern, but a severe weather outbreak is not anticipated.
- Still, residents across a portion of the southern Plains should be wary of the potential for storms capable of packing a punch in terms of wind, rain and hail through midweek.

## Pending Individual Assistance Declaration Request

State	Event	Date Submitted	Approved/Denied/Pending	Number of Counties/Tribes
WV	Severe Storms, Flooding, Landslides, and Mudslides (Appeal)	1/27/2023	Pending	2 Counties
TX	Severe Storms & Tornadoes Jan 24, 2023	2/7/2023	Pending	4 Counties
